TITAN PRO
SEED

2018 SEED GUIDE

A MESSAGE FROM THE PRESIDENT

During these complex times of rapid changes, consolidations, and introductions to new technologies, it's important to have an ally to help you navigate through the decisions you make every day. At Titan Pro, we believe in strong partnerships and using our knowledge and decades of experience in the industry to help our growers build successful operations. Let our experts help you create tomorrow's success today.

INDUSTRY LEADING PRODUCTS

Titan Pro's ability to remain flexible allows us to offer a diverse line-up of the best available product technologies. As an independent business with a unique model, we have the power to provide choices that others don't. We dedicate our time to choosing the best genetics to represent our brand so you can be sure you're getting exactly what you need for your fields.

MORE THAN A CUSTOMER

In an ever-changing market, we believe there is value in having someone you can trust. We not only provide the best products and tools for your farm to be successful, but also strive to create strong partnerships with our customers and provide thorough, authentic service to ensure you feel taken care of at every step in the process.

Jeff Meints – President/CEO

ADDITIONAL INFORMATION

Stewardship 48-49

CHOOSING THE RIGHT SEED FOR YOUR FIELD

At Titan Pro, we know how important it is to find a superior product that works for you. With Titan Pro Seed, you will not only get the right traits to match your field, but also a dedicated team that will work year-round to provide you with the information necessary to make a knowledgeable product selection.

When you choose Titan Pro, you are choosing a team of industry leaders passionate about providing quality seed that uses years of hands-on experience to provide you with a proven product to ensure success on your farm.

Finding the hybrid or variety that fits the exact needs of your farm can feel complex, but we're here to simplify your selection process.

PROVIDING A STRONG SOLUTION TO PROTECT YOUR ACRES

As resistance issues continue to increase each year, so does the importance of choosing the right crop protection solution to fit your fields.

At Titan Pro, we not only supply the best products available, but also utilize a custom approach when prescribing chemistry programs to our individual growers. Our specialized process includes our knowledgeable Crop Protection team and dedicated field agronomists who build specific programs you need to protect your fields from whatever may threaten them. This means you get the correct regimen for your acres from the start. As you continue to find ways to stay a step ahead of the ever-growing problem of resistance, it will be important to have the best tools available. Titan Pro is a leading force in the crop protection industry and will provide an effective solution for your farm.

MAXIMIZING PLANT PERFORMANCE

Because no two fields are the same, farmers are often left guessing what their soil needs in order to produce the largest return on investment possible. With Titan Pro, you'll receive a personalized analysis of what the specific needs of your fields are, leaving you with peace of mind knowing Titan Pro has taken the guess work out of selecting the right products for your farm.

Creating the perfect lineup for increased plant performance is something our team has spent years learning and perfecting. At Titan Pro, we recognize the importance of starting with a strong foundation for a successful crop.

PROTECTING WHAT'S IMPORTANT

In an unpredictable world, it helps to know that you're protected. When deciding who to put your faith in, reliability is a vital characteristic. Titan Pro will be there to help you get back on your feet should destruction hit.

When you choose Titan Pro as your crop insurance provider, you are choosing your local whole farm solution that knows your farm. We treat you like a neighbor because, in most cases, that's exactly what you are. Our insurance agents understand the difficulty you face and we will do everything we can to help, much like a neighbor would.

GERMINATE. DOMINATE. REPEAT.®

Now is the time to plant Titan Pro hybrids.

Our products are the result of a thorough selection process utilized to ensure our lineup performs impeccably in specific areas of the geography we cover. No two soils are the same. That's why we only have choices that are best suited for each one of our farmers throughout our footprint.

By choosing to plant Titan Pro, you are choosing genetic diversity, high performance, and maximum product potential.

TP 52-86 ^{GTA}

86 RM

High Yield Potential with Agrisure Artesian® Technology

- Widely adapted across the northern market
- Outstanding stalk and root strength
- Excellent early season vigor
- Impressive late season staygreen

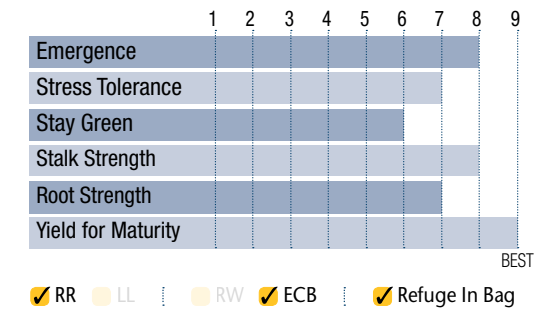

TP 73-91 ^{NEW} ^{2P}

91 RM

Excellent Stalks and Very Good Roots for Standability that Yields

- Excellent emergence and vigor for early planting
- Very good greensnap tolerance enhances standability
- Compact plant stature with semi-flex ear type
- Best positioned on fine textured soil types

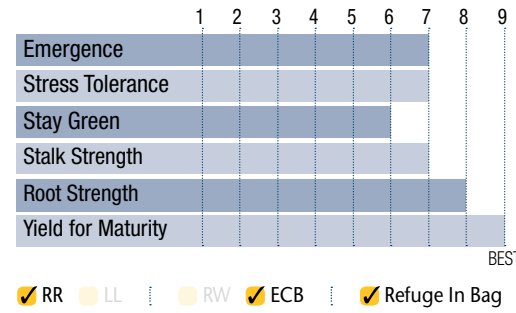

TP 57-86 ^{2P}

86 RM

VT Double PRO® RIB Complete® Opportunity for Northern Geographies

- Outstanding top end yielding hybrid
- Strong stalk and root strength
- Great dual purpose option for early markets
- Moves north very well

2M91-2P

91 RM

Excellent VT Double PRO® RIB Complete® Opportunity

- Great hybrid for your non-rootworm acre
- Very good stalks and roots to fit all rotations
- Attractive hybrid with great fall appearance
- Very good drought tolerance
- Responds well to higher populations

TP 65-90 ^{2P}

90 RM

Broad Adaptability from East to West with Girthy Ears

- Very good roots and stalks for season long standability
- Excellent early vigor for a fast start
- Early flowering allows for placement north of zone
- Best performance in 90-95 RM zone

TP 48-93 ^{2P}

93 RM

Excellent Stress Tolerance

- Widely adapted across various environments
- Very good early season emergence and vigor
- Great dual pupose hybrid for silage and grain
- Responds well to higher populations

TP 71-94 ^{3220A}

NEW

94 RM

ALSO AVAILABLE AS: TP 50-94 A
 RR LL RW ECB Refuge In Bag

Agrisure Artesian® Hybrid with Big Yield Potential

- Superior stalk and root strength
- Very good dual purpose hybrid
- Widely adapted hybrid east to west
- Excellent Goss' Wilt tolerance

TP 61-94 ^{3110A}
 GT LL RW ECB Refuge In Bag

GT LL RW ECB Refuge In Bag

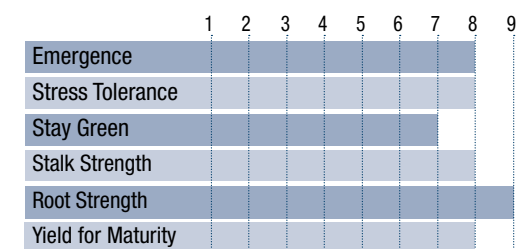

TP 30-96

96 RM

Exceptional Yield with Strong Agronomics

- Very good late season intactness with flared husk, late season appearance
- Impressive stalk and root strength
- Strong results in zone with the ability to move south
- Excellent performance at higher plant populations

RR LL RW ECB Refuge In Bag

2M95-2P

95 RM

ALSO AVAILABLE AS: 6295
 RR LL RW ECB Refuge In Bag

Outstanding Yield for the Non-Rootworm Acre

- High yielding hybrid with very good grain quality
- Very good stalks and roots to fit all rotations
- Excellent drought and greensnap tolerance
- Very good Goss' rating

RR LL RW ECB Refuge In Bag

TP 54-98 ^{2P}

98 RM

Great Yield Performance in Southern MN, Northern IA and West

- Very good heat and drought tolerance
- Consistent girthy ears
- Moves south as an early corn very well
- Excellent stalks and very good roots allow for flexible harvest

RR LL RW ECB Refuge In Bag

TP 58-95 ^{SS}

95 RM

Showy Hybrid with Strong Yield Potential

- Good east to west movement
- Position on productive soils for big yields
- Potential dual purpose hybrid
- Moves north well as a full season hybrid

RR LL RW ECB Refuge In Bag

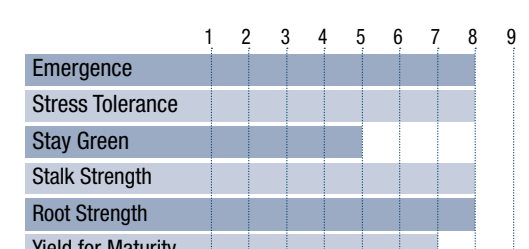

TP 68-98 ^{SS}

98 RM

Consistent Yield Performance with Impressive Agronomics

- Very good performance across all soil types
- Excellent root and stalk strength
- Flex ear type fits for all environments and populations
- Use caution in fields with a history of heavy Goss' Wilt

RR LL RW ECB Refuge In Bag

TP 78-98 ^{SS} **NEW**
98 RM

Robust Hybrid With Excellent Standability and Top Notch Yield Performance

- Excellent grain quality and test weight
- Responds well to higher planting populations
- Solid emergence and seedling vigor for early planting
- Very good performance north of zone as a full season hybrid

TP 39-00 ^{SS}
100 RM

High Yielding SmartStax® RIB Complete® Hybrid

- Outstanding potential as a full season hybrid
- Excellent stalks with very good roots
- Fast dry down with an open husk
- Performs well across a range of planting populations

TP 71-98 ^{2P} **NEW**
98 RM

ALSO AVAILABLE AS: **TP 70-98** **NEW**
 RR LL RW ECB Refuge In Bag

Versatile Hybrid With Top Performance Across Environments

- Shorter plant type with very good root strength
- Excellent drydown enhances yield to moisture ratio
- Very good Northern Corn Leaf Blight tolerance
- Semi flex ear type responds to increasing plant populations

TP 40-00
100 RM

Conventional Hybrid with Unique Genetic Package

- Superior yield with solid agronomics
- Excellent stalk and root strength
- Broadly adapted hybrid east to west
- Great plant health and late season staygreen

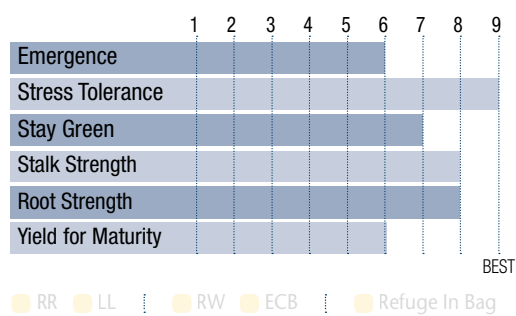

TP 50-99 ^A
99 RM

ALSO AVAILABLE AS: **TP 33-99** ^{5122A}
 GT LL RW ECB Refuge In Bag

Conventional Hybrid with Agrisure Artesian® Technology

- Consistent yields with solid agronomics
- Very good stalks and roots
- Broadly adapted hybrid that works east to west
- Agrisure Artesian® technology provides additional drought tolerance to a proven hybrid

TP 65-00 ^{DG2P}
100 RM

Droughtgard® Option with Excellent Yield Stability

- Defensive hybrid with very good top end yield
- Excellent performance south of zone
- Very good stalk strength and late season appearance
- Top performance on tough and variable soil types

TP 58-01 ^{2P}

101 RM

ALSO AVAILABLE AS: **TP 78-01** ^{NEW}
 RR LL | RW ECB | Refuge In Bag

Excellent Top End Yield Potential with Strong Agronomics

- Widely adapted hybrid east to west
- Fits well across all soil types
- Very good stress tolerance
- Excels as a full season hybrid

✓ RR LL | RW ✓ ECB | ✓ Refuge In Bag

TP 67-02 ^{SS}

102 RM

Strong Yield Potential with Impressive Late Season Appearance

- Very good stress tolerance for placement in all soil types
- Medium stature with strong roots and stalks
- Semi flex ear type for varying plant populations
- Best performance when kept in zone or south of zone

✓ RR ✓ LL | ✓ RW ✓ ECB | ✓ Refuge In Bag

TP 75-01 ^{SS}

101 RM

NEW

New Lead SmartStax® RIB Complete® Hybrid with Dependable Agronomics

- Top performer in moderate to highly productive soil types
- Solid stress tolerance enhances broad adaptation
- Excellent emergence for early planting and no-till
- Best performance at medium high to high planting populations

✓ RR ✓ LL | ✓ RW ✓ ECB | ✓ Refuge In Bag

TP 40-03

103 RM

Conventional Option with High Yield Potential

- Medium-tall hybrid with medium ear placement
- Strong late season intactness
- Responds very well to productive soils
- Very good Goss' Wilt tolerance

RR LL | RW ECB | Refuge In Bag

TP 61-01 ^{3122A}

101 RM

ALSO AVAILABLE AS: **TP 31-01** ^{3011A}
 GT LL | RW ✓ ECB | Refuge In Bag

Broadly Adapted Hybrid with Agrisure Artesian® Technology

- Consistent performance across the Corn Belt
- Excellent stalks and very good roots
- Great choice for corn-on-corn acres
- Agrisure Artesian® technology offers proven drought tolerance

✓ GT LL | ✓ RW ✓ ECB | ✓ Refuge In Bag

TP 43-01 ^{GTA}
 GT LL | RW ECB | Refuge In Bag

TP 60-01 ^A
 GT LL | RW ECB | Refuge In Bag

TP 53-03 ^{2P}

103 RM

High Yielding Hybrid with Solid Agronomics

- Big yield potential with fast dry down
- Perfect fit for the corn soybean rotated acre
- Keep in zone as full season hybrid for big success
- Excellent greensnap allows it to move west in zone

✓ RR LL | RW ✓ ECB | ✓ Refuge In Bag

TP 77-06 ^{SS} **NEW**
106 RM

ALSO AVAILABLE AS: **TP 76-06** ^{2P} **NEW**
 RR LL RW ECB Refuge In Bag

Outstanding Top End Yield Potential With Very Good Disease Tolerance

- Leaf disease tolerance makes this a good choice for continuous corn
- Very good stalk and root strength with good greensnap tolerance
- Top performance at medium to high plant populations
- Very good southern movement into 108-110 relative maturity zone

TP 40-09
109 RM

Exciting Conventional Option with Top End Yield

- Great hybrid with a wide area of adaptation
- Medium stature hybrid with girthy ears and deep kernels
- Outstanding stalk and root strength
- High populations will result in top end yield potential

2M08-2P
108 RM

High Yielding VT Double PRO® RIB Complete® Hybrid

- Great hybrid with solid agronomics
- Very strong stalks and roots
- Very consistent ear within the row, results in strong yield
- Appealing late season intactness

TP 58-10 ^{SS}
110 RM

High Yielding Hybrid with Consistency

- Widely adapted hybrid from NE to IL
- Responds well to high plant populations
- Medium stature hybrid with strong stalks and roots
- Great option for high management situations

TP 59-08 ^{SS}
108 RM

ALSO AVAILABLE AS: **TP 70-06** **NEW**
 RR LL RW ECB Refuge In Bag

Stable Top End Yields in Highly Productive Soils

- Widely adapted across soil types and yield environments
- Pushes south well into 110 RM market
- Excellent NCLB and Goss' tolerance
- Responds well to high fertility and population

TP 66-10 ^{2P}
110 RM

Dominating Top End Yield Performance

- Handles poorly drained soils as well as any hybrid in the industry
- Consistent ear development down the row
- Excellent dual purpose hybrid for grain or silage
- Responds to high plant populations, even on tough ground

TP 55-11 2P

111 RM

High Yielding Hybrid with Excellent Plant Health

- Strong yield potential east to west
- Consistent across a variety of soil types
- Responds well to high plant population
- Contains ASR tolerance gene for stalk rot control

✓ RR ✓ LL ✓ RW ✓ ECB ✓ Refuge In Bag

TP 57-13 SS

113 RM

ALSO AVAILABLE AS: TP 30-13

✓ RR ✓ LL ✓ RW ✓ ECB ✓ Refuge In Bag

Outstanding Yield Potential Across Environments

- Consistent yields and plant stature under stress conditions
- Excellent roots and very good stalk strength
- Impressive early season vigor for no-till soils
- Plant health responds well to fungicides

TP 54-13 2P

✓ RR ✓ LL ✓ RW ✓ ECB ✓ Refuge In Bag

✓ RR ✓ LL ✓ RW ✓ ECB ✓ Refuge In Bag

TP 71-12 DG2P

112 RM

ALSO AVAILABLE AS: TP 70-12 NEW

✓ RR ✓ LL ✓ RW ✓ ECB ✓ Refuge In Bag

Consistent Ear Development Plus Deep Kernels Equals Big Yields

- Elite yield performance in high plant populations
- Broad adaptability across soil types and yield environments
- Excellent yield response to fungicide applications
- Dependable late season standability despite below average staygreen

✓ RR ✓ LL ✓ RW ✓ ECB ✓ Refuge In Bag

TP 56-14 DG2P

114 RM

Droughtgard® Option with High Yield Potential

- Great fit from NE to IL
- Outstanding stalks and root strength
- Responds well to higher plant populations
- Very good greensnap tolerance

✓ RR ✓ LL ✓ RW ✓ ECB ✓ Refuge In Bag

TP 74-12 SS

112 RM

Top Performer in High Management Production Systems

- Semi flex ear type with excellent grain quality and test weight
- Very good early plant vigor for early planting into cool soils
- Medium-tall plant type with very good root and stalk strength
- Excellent candidate for fungicide application despite solid leaf disease tolerance

✓ RR ✓ LL ✓ RW ✓ ECB ✓ Refuge In Bag

TP 68-14 SS

114 RM

The Complete Package; Top End Yield with Agronomics

- Handles all soil types from variable to highly productive
- Outstanding grain quality and test weight
- Robust plant type with season long standability
- Responds to high populations in all yield environments

✓ RR ✓ LL ✓ RW ✓ ECB ✓ Refuge In Bag

ROWS OF ROI

When you make the decision to plant Titan Pro soybeans, you're choosing top genetics developed specifically for your growing conditions. We take pride in our diverse portfolio and ability to identify the right variety for your situation. If you are looking for a soybean variety with top plant potential, tailored to thrive in your fields, look no further than Titan Pro.

TP-06X57 NEW
0.6 RM

Top Choice for IDC Acres in This Maturity Group

- Excellent emergence and vigor for planting in cold soils
- Very good stress tolerance for broad adaptability
- Rps 1c gene for PRR protection
- PI 88.788 cyst protection

TP-12L75
1.2 RM

Strong LibertyLink® Option for the Early Group 1 Market

- Bushy plant type with early vigor to fill the rows
- Solid IDC rating
- Very good SDS rating
- PI 88.788 cyst protection

TP-08X17 NEW
0.8 RM

Stable Yield Performance Across All Late Group 0 Acres

- Very good southern movement as an early maturity soybean
- Medium plant height with solid standability
- Rps 3a gene for PRR protection
- PI 88.788 cyst protection

TP-14X27 NEW
1.4 RM

Broad Adaptation Across the Entire Upper Midwest

- Solid disease tolerance plus exciting yield performance
- Medium plant height enhances very good standability
- Rps 1k + 3a genes for PRR protection
- PI 88.788 cyst protection

TP-11X37 NEW
1.1 RM

Exciting Yield Potential With Top Notch Standability

- Excellent IDC tolerance
- This soybean can be placed on all soil types and yield environments
- Rps 3a gene for PRR protection
- PI 88.788 cyst protection

TP-14L57 NEW
1.4 RM

Solid Agronomics With Top Notch Yield Performance in LibertyLink® Package

- Excellent emergence and early vigor
- Very good resistance to Brown Stem Rot
- Good field tolerance for PRR protection
- Excellent SCN tolerance

15M22

1.5 RM

Dominant Line For Anyone Growing Soybeans in Group 1

- Bin buster bean with cyst protection
- Very strong IDC rating
- 1c gene for PRR protection
- PI 88.788 cyst protection
- Elite product fits east to west

TP-18X97

NEW

1.8 RM

Broadly Adapted Variety With Very Good Performance South of Zone

- Industry leading standability in late group 1
- Outstanding Brown Stem Rot resistance
- Rps 1a + 3a genes for PRR protection
- PI 88.788 cyst protection

TP-16X77

NEW

1.6 RM

Proven Genetic Background in Roundup Ready 2 Xtend® Technology

- Very good performance north of maturity zone
- Good SDS tolerance for mid-group 1 maturity
- Rps 1c gene for PRR protection
- PI 88.788 cyst protection

TP-19X06

1.9 RM

Best in Class White Mold Tolerance for Challenging Acres

- Excellent standability across environments
- Moderate resistance to Brown Stem Rot
- Good IDC tolerance enhances broad adaptability
- PI 88.788 cyst protection
- Early maturing variety with outstanding movement north of zone

TP-16L86

1.6 RM

Tremendous Yield Performance in LibertyLink® Package

- Broadly adapted across variable and highly productive soils
- Very good IDC tolerance
- Very good early vigor and solid defensive package
- PI 88.788 cyst protection

TP-20R25

2.0 RM

Versatile Soybean with Chart Topping Yield

- Widely adapted across the geography
- Excellent IDC rating
- 1c gene for PRR protection
- PI 88.788 cyst protection
- Complete defensive package

TP-20X57 NEW

2.0 RM

Group 2 Roundup Ready 2 Xtend® Variety With Broad Utility from East to West

- Attractive variety with standability and top end yield potential
- Solid IDC rating
- Rps 3a gene for PRR protection
- PI 88.788 cyst protection

TP-23L54

2.3 RM

Dominant Performance with LibertyLink® Tolerance

- Great early season vigor resulting in strong yields
- Above average IDC rating
- Above average PRR protection
- PI 88.788 cyst protection
- Caution using in fields with a history of Sudden Death Syndrome

TP-21X46

2.1 RM

Step Change in Yield Performance for Early Group 2

- Dominated yield trials in this maturity
- Excellent stress tolerance for broad adaptability
- Moderate resistance to Brown Stem Rot
- PI 88.788 cyst protection

TP-24L27 NEW

2.4 RM

New Level of Yield Performance for Group 2 LibertyLink® Soybean Acres

- Top notch Sudden Death Syndrome tolerance for broad adaptability
- Medium tall plant type with very good standability
- Rps 1K gene for PRR protection
- Excellent SCN tolerance

TP-21L15

2.1 RM

LibertyLink® Soybean with Big Yield Potential

- Medium-height plant with excellent standability
- Very good SDS tolerance rating
- Excellent SCN resistance score
- Excellent early season emergence rating

TP-24X87 NEW

2.4 RM

A Top Choice for Roundup Ready 2 Xtend® Acres in the Central and Western Corn Belt

- Very good tolerance to Sudden Death Syndrome
- Resistant to Brown Stem Rot
- Good field tolerance for PRR protection
- PI 88.788 cyst protection

TP-24R26

2.4 RM

Broad Acre Variety That Performs Across Geographies

- Very good IDC, SDS, and SWM tolerance
- Brown Stem Rot Resistant
- Top performer in yield trials two years in a row
- PI 88.788 cyst protection

TP-28X47

NEW

2.8 RM

Leader Variety in Late Group 2 That Belongs in Every Planting Plan

- Step change in yield performance with impeccable agronomics
- Excellent SDS tolerance
- Rps 1c gene for PRR protection with excellent field tolerance
- PI 88.788 cyst protection

TP-26L85

2.6 RM

Versatile LibertyLink® Soybean Variety

- Medium-tall bushy type with excellent standability
- Very good IDC rating
- Excellent SCN tolerance
- Unique genetics: high yield + solid defense

TP-29L67

NEW

2.9 RM

A Top Choice for Late Group 2 LibertyLink® Soybean Acres

- Very good defensive package leads to broad adaptability
- Excellent emergence for a fast start in the spring
- Rps 1c gene for PRR protection
- Excellent SCN tolerance

TP-26X37

NEW

2.6 RM

Exciting Level of Yield Performance With an Excellent Agronomic Package

- Very good IDC and SDS tolerance
- Excellent choice for stress acres
- Rps 1c gene for PRR protection with top notch field tolerance
- PI 88.788 cyst protection

TP-30X77

NEW

3.0 RM

Plant Type and Standability Make This A Great Choice for Highly Productive Acres

- Very good SDS tolerance
- Excellent performance north of maturity zone
- Rps 1c gene for PRR protection
- PI 88.788 cyst protection

TP-31X26

3.1 RM

Excellent Standability Enhances Top End Yield Potential

- Rps 1c gene with excellent Phytophthora field tolerance
- Excellent choice for highly productive acres
- Moderately resistant to Brown Stem Rot
- PI 88.788 cyst protection

TP-35X17

NEW

3.5 RM

Roundup Ready 2 Xtend® Variety That Raises the Performance Bar

- Attractive variety with unmatched consistency
- Very good SDS tolerance rating
- Rps 1c gene for PRR protection
- PI 88.788 cyst protection

TP-34L47

NEW

3.4 RM

Consistent Yield Performance Helps This LibertyLink® Variety Rise to the Top

- Solid agronomic package for broad adaptability
- Very good performance north to I-80 corridor
- Rps 1K gene for PRR protection
- Excellent SCN tolerance

TP-37X57

NEW

3.7 RM

Excellent Stress Tolerance Enhances Broad Adaptability

- Medium tall plant type with very good standability
- Excellent emergence for early planting and no-till acres
- Rps 1c gene for PRR protection
- PI 88.788 cyst protection

TP-34X86

3.4 RM

Next Level Yield Performance at Mid-Group 3

- Outstanding emergence and early vigor
- Top of the line stress tolerance
- This bean belongs on all soil types
- PI 88.788 cyst protection

NOTES

QUALITY SEED FOR A GREAT START

When you choose to plant a Titan Pro alfalfa variety you are choosing a brand that will set you up for success from day one. Facing variable challenges with soil moisture, temperature, and disease pressure requires the right solution. Titan Pro offers a wide range of alfalfa options that give you the tools to face these challenges as well as top-end yield, high forage quality, and superior plant health for success in your operation.

Choose Titan Pro for the best variety for your fields as well as superior service from our dealers who are committed to helping you at every turn.

ALFALFA

AmeriStand 407 TQ

Superior Tonnage and Quality

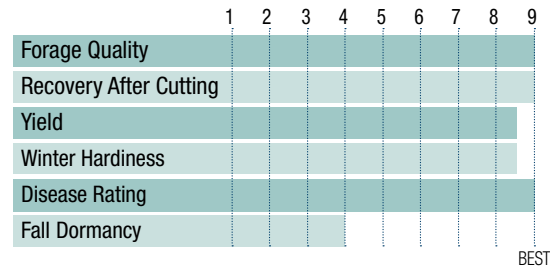

- High yielding variety meeting grower demands
- Superior disease resistance
- Very good level of nematode resistance
- Wider harvest window allows for flexibility around harvest delays

AmeriStand 480 HVX RR ^{NEW}

New Genetically Enhanced Alfalfa with Roundup Ready® Technology

- Increase harvest time flexibility
- Higher likelihood of harvesting premium quality hay
- Roundup Ready® Technology for excellent weed control management

317 HT

Ultra Dark Green Foliage with Big Yield Potential

- Handles heavy wheel traffic at harvest
- Long rotation with outstanding persistence
- Works great on heavy, wet ground
- Great for longer rotation

AmeriStand 455 TQ RR

Traffic Tested Alfalfa with Roundup Ready® Tolerance

- Performance of AmeriStand 407TQ with herbicide resistance
- Excellent forage quality
- Very fast recovery excellent for frequent harvest schedules
- Improved salt tolerance of germinating seeds

312 HM

Fast Recovery Gives You That Extra Cutting

- Early spring growth allows for a quick start
- Excellent disease resistance
- Performs best under high management
- Very good level of nematode resistance

409 HR

High Resistance to Aphanomyces Race 1 and Race 2

- Outstanding persistence and winter survival
- High yield with great quality
- Handles all soil types very well
- Outstanding choice with the complete package

Multi-Advantage

Widely Adapted Variety with Yield and Quality

- Vigor, yield, and winter survival in one variety
- Very fast recovery after harvest
- Deep green color with upright growth
- Adapted to all fall dormancy 3 and 4 areas

VNS

Designed for the Farmer Who Demands Economy Alfalfa

- Ideal for short or long rotation
- Blend of Alfalfas designed to give consistent performance
- Perfect blend of economy plus in-field performance

TP 628 LH

The Latest Innovation in Potato Leafhopper Control

- Genetic resistance to potato Leafhopper plus big yields
- Outstanding forage quality
- Excellent spring vigor
- Strong disease package

Notes

DO NOT EXPORT ROUNDUP READY® ALFALFA SEED OR CROP, INCLUDING HAY OR HAY PRODUCTS, TO CHINA PENDING IMPORT APPROVAL. IN ADDITION, DUE TO THE UNIQUE CROPPING PRACTICES DO NOT PLANT ROUNDUP READY® ALFALFA IN IMPERIAL COUNTY, CALIFORNIA, PENDING IMPORT APPROVALS AND UNTIL FORAGE GENETICS INTERNATIONAL, LLC (FGI) GRANTS EXPRESS PERMISSION FOR SUCH PLANTING. IT IS A VIOLATION OF NATIONAL AND INTERNATIONAL LAW TO MOVE MATERIAL CONTAINING BIOTECH TRAITS ACROSS BOUNDARIES INTO NATIONS WHERE IMPORT IS NOT PERMITTED. GROWERS SHOULD TALK TO THEIR PRODUCT PURCHASER TO CONFIRM THEIR BUYING POSITION FOR THIS PRODUCT.

Forage Genetics International, LLC ("FGI") is a member of Excellence Through Stewardship® (ETS). FGI products are commercialized in accordance with ETS Product Launch Stewardship Guidance, and in compliance with FGI's Policy for Commercialization of Biotechnology-Derived Plant Products in Commodity Crops. Certain products have been approved for import into key export markets with functioning regulatory systems. Any crop or material produced from this product can only be exported to, or used, processed or sold in countries where all necessary regulatory approvals have been granted. It is a violation of national and international law to move material containing biotech traits across boundaries into nations where import is not permitted. Growers should talk to their grain handler or product purchaser to confirm their buying position for this product. Growers should refer to <http://www.biotradestatus.com/> for any updated information on import country approvals. Excellence Through Stewardship® is a registered trademark of Biotechnology Industry Organization.

ALWAYS READ AND FOLLOW PESTICIDE LABEL DIRECTIONS. Roundup Ready® crops contain genes that confer tolerance to glyphosate, the active ingredient in Roundup® brand agricultural herbicides. Roundup® brand agricultural herbicides will kill crops that are not tolerant to glyphosate. Genuity Design®, Genuity Icons, Genuity®, Roundup Ready® and Roundup® are trademarks of Monsanto Technology LLC, used under license by FGI.

Monsanto Company is a member of Excellence Through Stewardship® (ETS). Monsanto products are commercialized in accordance with ETS Product Launch Stewardship Guidance, and in compliance with Monsanto's Policy for Commercialization of Biotechnology-Derived Plant Products in Commodity Crops. Certain products have been approved for import into key export markets with functioning regulatory systems. Any crop or material produced from this product can only be exported to, or used, processed or sold in countries where all necessary regulatory approvals have been granted. It is a violation of national and international law to move material containing biotech traits across boundaries into nations where import is not permitted. Growers should talk to their grain handler or product purchaser to confirm their buying position for this product. Growers should refer to <http://www.biotradestatus.com/> for any updated information on import country approvals. Excellence Through Stewardship® is a registered trademark of Biotechnology Industry Organization.

B.t. products may not yet be registered in all states. Check with your Monsanto representative for the registration status in your state.

IMPORTANT IRM INFORMATION: RIB Complete® corn blend products do not require the planting of a structured refuge except in the Cotton-Growing Area where corn earworm is a significant pest. SmartStax® RIB Complete® corn blend is not allowed to be sold for planting in the Cotton-Growing Area. See the IRM/Grower Guide for additional information. Always read and follow IRM requirements.

DroughtGard® Hybrids with RIB Complete® corn blend the refuge seed may not always contain DroughtGard® Hybrids trait.

ALWAYS READ AND FOLLOW DIRECTIONS FOR USE ON PESTICIDE LABELING.IT IS A VIOLATION OF FEDERAL AND STATE LAW to use any pesticide product other than in accordance with its labeling. NOT ALL formulations of dicamba or glyphosate are approved for in-crop use with Roundup Ready 2 Xtend® soybeans. ONLY USE FORMULATIONS THAT ARE SPECIFICALLY LABELED FOR SUCH USES AND APPROVED FOR SUCH USE IN THE STATE OF APPLICATION. XTENDIMAX™ HERBICIDE WITH VAPORGRIP™ TECHNOLOGY AND IN CROP USES MAY NOT BE APPROVED IN ALL STATES. Contact the U.S. EPA and your state pesticide regulatory agency with any questions about the approval status of dicamba herbicide products for in-crop use with Roundup Ready 2 Xtend® soybeans. Roundup Ready 2 Xtend® soybeans contains genes that confer tolerance to glyphosate and dicamba. Glyphosate will kill crops that are not tolerant to glyphosate. Dicamba will kill crops that are not tolerant to dicamba. Contact your Monsanto dealer or refer to Monsanto's Technology Use Guide for recommended weed control programs. Genuity®, RIB Complete and Design®, RIB Complete®, Roundup Ready 2 Technology and Design®, Roundup Ready 2 Xtend®, Roundup Ready 2 Yield®, Roundup Ready®, Roundup®, SmartStax and Design®, SmartStax®, VaporGrip™, VT Double PRO®, VT Triple PRO®, and XtendiMax™ are trademarks of Monsanto Technology LLC. LibertyLink and the Water Droplet Design® is a registered trademark of Bayer. Herculex® is a registered trademark of Dow AgroSciences LLC. Respect the Refuge and Corn Design® and Respect the Refuge® are registered trademarks of National Corn Growers Association. All other trademarks are the property of their respective owners.

Seed containing a patented trait can only be used to plant a single commercial crop from which seed cannot be saved and replanted. Examples of seed containing a patented trait include but are not limited to Genuity® Roundup Ready 2 Yield® soybeans, and Roundup Ready 2 Xtend® soybeans. Additional information and limitations on the use of these products are provided in the Monsanto Technology Stewardship Agreement, the Monsanto Technology Use Guide, and the Roundup Ready 2 Xtend® Soybean Technology Use Guide Supplement. U.S. patents for Monsanto technologies can be found at the following webpage: <http://www.monsantotechnology.com>

Think Before You Bin Run

Verification Required

Most soybeans are still covered by a variety patent, and you will not be able to save and plant the seed from those varieties without a license giving you that added right. Check with your seed supplier before saving.

Higher Seeding Rate

Higher seeding rates may be required for bin-run compared to new branded seed.

Yield Loss

Genuity® Roundup Ready 2 Yield® soybean seed outyielded bin-run Roundup Ready® soybeans by 6.1 bu/A.¹

Cleanout Loss

Loss of seed or shrink occurs during seed cleaning and handling processes for bin-run seed.

Lost Income

Income lost by not selling a bushel of soybeans that is saved for planting the next year.

¹First year results of 2-year protocol study with independent cooperators across 8 locations examining the yield differences of saved Roundup Ready soybeans versus newly purchased Roundup Ready 2 Yield soybeans.

Agrisure® Logo & Trademark Attribution

Consult bag tags for E-Z Refuge product herbicide options; only those labeled GT/LL may be sprayed with glufosinate. Agrisure®, Agrisure Artesian®, Artesian™, Agrisure Duracade®, Agrisure Viptera® and E-Z Refuge® are trademarks of a Syngenta Group Company.

LibertyLink® Logo, Disclaimer & Trademark Attribution

Seed products with the LibertyLink® (LL) trait are resistant to the herbicide glufosinate ammonium, an alternative to glyphosate in corn, and combine high-yielding genetics with the powerful, non-selective, postemergent weed control of Liberty® herbicide for optimum yield and excellent weed control. LibertyLink®, Liberty® and the Water Droplet logo are registered trademarks of Bayer.

Herculex® Logo, Disclaimer & Trademark Attribution

The Insect Resistance Management Logo & Disclaimer

Before opening a bag of seed, be sure to read and understand the stewardship requirements, including applicable refuge requirements for insect resistance management, for the biotechnology traits expressed in the seed set forth in the technology agreement that you sign. By opening and using a bag of seed, you are reaffirming your obligation to comply with those stewardship requirements.

Herculex Trademark Attribution

®HERCULEX, and the HERCULEX Shield Logo and are trademarks of The Dow Chemical Company ("Dow") or an affiliated company of Dow. HERCULEX Insect Protection technology by Dow AgroSciences and Pioneer Hi-Bred. Follow IRM, grain marketing and all other stewardship practices and pesticide label directions.

Product notes:

CROP AND GRAIN MARKETING STEWARDSHIP

Dow AgroSciences is a member of Excellence Through Stewardship® (ETS). Dow AgroSciences' products are commercialized in accordance with ETS product launch stewardship guidance, and Dow AgroSciences' Product Launch Stewardship Policy.

Before selecting hybrids for your crop plan, Dow AgroSciences recommends you know and understand whether the hybrid you have chosen is a conventional hybrid, one approved for export or one not yet approved for export. It is important that you consult your trait provider's technical agreements prior to planting to understand crop requirements and approved corn markets.

Any grain or material produced from Bt seed can only be exported to, or used in, processed in or sold in countries where all necessary regulatory approvals have been granted. It is a violation of national and international law to move material containing biotechnology traits across boundaries into nations where import is not permitted. Talk to your grain handler or purchaser in advance to facilitate appropriate crop and grain or material handling and marketing.

For further information about your crop or grain marketing options, contact Dow AgroSciences at 877-4-TRAITS (877-487-2487). Information regarding the regulatory and market status of agricultural biotechnology products can be found at: biotradestatus.com.

LibertyLink® Soybeans

The LibertyLink® system is a simply better solution combining high-performing genetics with excellent weed control on tough-to-control and resistant weeds for high yields that deliver. With more than 60 million acres of soybeans, corn, cotton and canola now having the LibertyLink trait, growers can spray powerful Liberty®, the only working nonselective herbicide to handle tough-to-control weeds, including Palmer amaranth, giant ragweed, kochia, waterhemp and marestalk.

LibertyLink® Corn

The LibertyLink® system enables powerful Liberty®, the only working nonselective herbicide that is effective on tough-to-control grasses and broadleaves, for over-the-top use on over 50 million LibertyLink®-enabled corn hybrid acres with Herculex®, Genuity® SmartStax® and Agrisure® hybrids with corn borer protection The LibertyLink system is a simply better solution built upon high-performing genetics and excellent weed control that delivers real yield.

Liberty® Herbicide

Every missed weed can impact yield. Liberty® herbicide is a simply better solution for weed control that handles tough-to-control and resistant weeds.

- Only working nonselective herbicide for grasses and broadleaf weed control
- Unique site of action, unlike any other herbicide on the market
- S.T.O.P.s tough-to-control and resistant weeds
- Neighbor-friendly and convenient to use

With more than 60 million acres of canola, corn, cotton and soybeans now having the LibertyLink trait, growers can spray powerful Liberty®, the only working nonselective herbicide to handle tough-to-control weeds, including Palmer amaranth, giant ragweed, kochia, waterhemp and marestalk.

LibertyLink® Patent Statement

Seeds containing the LibertyLink® trait are protected under multiple U.S. patents and may be planted only to produce one (1) commercial crop, and only after signing a Bayer Grower Technology Agreement. It is illegal to save or catch seeds containing the LibertyLink trait for use as planting seed or for transfer to others for use as planting seed.
