Test Comments: *This plot was one of the first we planted this season and conditions were good. A cold period set in but seedlings had very good emergence, just a bit slower than normal. Plants stood strong at harvest and had minimal disease incidence all season. Ears were well pollinated with good girth with large kernels. Most ears were pointed downward with weak ear shanks. Strong cobs made shelling easy.*

† See last page for abbreviation descriptions. Dark colored row identifies the check product found in early- and full-season tests. **Bold** yields are significantly above test average by LSD(0.10). **Italicized** brands exceed the grain moisture limit for this test. **ns** = column values not significantly different
