Test Comments: *This site was planted in near perfect conditions. Don, our host grower, said that the corn had a hard time coming up, due to too much rain. He also said that there were three big storms that hit the area throughout the growing season. There were spots of stalk lodging and low final stands. During the September site visit the corn was standing well and looked pretty good.*

† See last page for abbreviation descriptions. Dark colored row identifies the check product found in early- and full-season tests. **Bold** yields are significantly above test average by LSD(0.10). **Italicized** brands exceed the grain moisture limit for this test. **ns** = column values not significantly different
