Yield & Income Factors: Base Moisture = 15.0% Shrink = 1.3 Drying = \$0.025 Prices: GMO = \$3.00; non-GMO = \$3.00

Test Comments: This site was planted in very good conditions. Kevin, our host farmer, said that the rain was about right but there was just not enough heat for the summer. Grain moistures are still a little wet. The corn was standing very well and weed control was also very good. The soil under the early-season test was slightly more productive than that under the full-season test, which is reflected in the check yield.

† See last page for abbreviation descriptions. Dark colored row identifies the check product found in early- and full-season tests. **Bold** yields are significantly above test average by LSD(0.10). **Italicized** brands exceed the grain moisture limit for this test. **ns** = column values not significantly different
