Test Comments: *Corn stood well here, in spite of a 10% hail loss from a June hail event. Moderate temps all summer, and the cool*

August got this location through a period of 38 days with only 0.2" rain in late summer. Dru told me that this his yields are good this year, but not as good as last year's corn crop.

† See last page for abbreviation descriptions. Dark colored row identifies the check product found in early- and full-season tests. **Bold** yields are significantly above test average by LSD(0.10). **Italicized** brands exceed the grain moisture limit for this test. **ns** = column values not significantly different
