Test Comments: *This location achieved excellent stands, with the early part of the growing season being fantastic. Rainfall was limited later in the season, as well as a lack of heat. This delayed maturity, but also helped reduce the amount of disease that could impact stalk quality. Plants were all standing perfect, pollination was excellent filling out most ears to the tip. All ears were still upright at harvest.*

† See last page for abbreviation descriptions. Dark colored row identifies the check product found in early- and full-season tests. **Bold** yields are significantly above test average by LSD(0.10). **Italicized** brands exceed the grain moisture limit for this test. **ns** = column values not significantly different
