Yield & Income Factors: Base Moisture = 15.0% Shrink = 1.3 Drying = \$0.025 Prices: GMO = \$3.25; non-GMO = \$3.25

Test Comments: *Cool and wet weather delayed planting here. Emergence and early stands were very good. Heat units were plentiful all year. Eric pointed out that strong winds just prior to pollination caused lodging in some varieties. Moisture was normal here, but it turned dry for a few weeks around pollination. Yields were good, but not as good as the past few years. Stalk lodging caused some yield variation.*

† See last page for abbreviation descriptions. Dark colored row identifies the check product found in early- and full-season tests. **Bold** yields are significantly above test average by LSD(0.10). **Italicized** brands exceed the grain moisture limit for this test. **ns** = column values not significantly different
