Luke Brendemuhl luke.brendemuhl@firstseedtests.com, (218) 790-4497									New test site, no yield history

Yield & Income Factors: Base Moisture = 15.0% Shrink = 1.3 Drying = \$0.025 Prices: GMO = \$2.75; non-GMO = \$2.75

Test Comments: The tests and surrounding field had a great start to the growing season. Plants were close to chest high in early July.

At harvest, we noticed that certain hybrids had experienced varying degrees of greensnap earlier in the season which impacted yield level and and yield consistency resulting in elevated C.V. and LSD values.

† See last page for abbreviation descriptions. Dark colored row identifies the check product found in early- and full-season tests. **Bold** yields are significantly above test average by LSD(0.10). **Italicized** brands exceed the grain moisture limit for this test. **ns** = column values not significantly different
