**Yield & Income Factors:** Base Moisture = 13.0% Shrink = 1.0 Drying = \$0.000 Prices = \$9.00 GMO; \$9.00 non-GMO

**TEST COMMENTS:** *Planting conditions were ideal and decent emergence followed. Plot never really experienced any dry spells all season long. Phosphorus and potassium levels in this field are high due to years of manure application, which has always had a tendency to make the plants grow tall and lodge. This year was no different, but there were not any diseases to mention and pods were filled with oversized seeds.*

† See last page for abbreviation descriptions. Results in **bold** are significantly above test average by LSD (0.10). **ns** = column values not significantly different.
