TEST COMMENTS: *Planting was delayed in the Litchville area this year due to a very wet spring. A very wet growing season followed, with this site receiving 17 inches of rain above the yearly average. In well drained areas of the field, soybean plants looked outstanding early. This test site and neighboring fields had severe white mold issues. Harvest has been a struggle in this area due to persistent wet conditions.*

† See last page for abbreviation descriptions. Results in **bold** are significantly above test average by LSD (0.10). **ns** = column values not significantly different.
