HARVESTED - STAND:	Oct 5 34.0 /A

TEST COMMENTS:

The impact of a dry spell from planting through mid-July was quite apparent on this farm. Ear length and overall ear size were shorter than normal. Rainfall was very sporadic in the area through the early summer months. The heavy bands of showers that fell were not consistent across northwest Iowa. Neighboring fields not far down the road seemed to receive showers that varied over 1/2" to 1" above what this field received from each storm. A few big showers did finally arrive during late July and August which helped kernels fill nicely.
