### TEST COMMENTS:

*This site was planted the last week of April and had excellent conditions for emergence, which produced great stands. Although drought conditions persisted in this area and rainfall totals registered a deficit for the season, the small showers that fell on this field were just enough to keep the corn plants healthy. Very high fertility levels on this farm, combined with excellent pollination and good overall plant health, allowed for high-end yields. Stalk quality was beginning to deteriorate at harvest as reflected in the lodging scores in this report.*
