TEST COMMENTS:

This Harcot clay loam has a history of producing very well on Donald's farm and can handle higher populations so we bumped up planting rates just a little. Rainfall patterns through the season seemed to hit at just the right time. None were excessive and several were +1 in. This was a garden spot of sorts for northern Iowa. This area even experienced some relief from the D2 (severe) drought that was in place at mid-July. Plants stood well at harvest and ear shanks were strong. No signs of disease were observed.
