TEST COMMENTS:

We set the row cleaners down here to get deep enough for good soil moisture at planting. Great seedling emergence, and the roots went deep in June. Marc commented that the yields here were amazing, considering the below-average rainfall this site received all season. Rains came at the right time, and yields responded to the high fertility here. High winds came through in early Sept, and the lodging scores reflect this event. Temperatures and GDU's were above average, even into October.
