TEST COMMENTS:

This plot was planted into beautiful soil conditions, and the corn looked great on June 9 when we took stand counts, and again about 10 days later. In talking with Dru about growing conditions, he said that some of his fields south of Easton got a lot less rain than fields north of Easton. He was, "not sure how crops made it through" and he had never seen it as dry as it was this summer. Still, plants in this plot showed little lodging during harvest, and ears showed good kernel fill. Disease and pest pressure were very low.
