TEST COMMENTS:

We attempted to plant this plot earlier but showers kept popping up. When we could go, planting conditions were very good. The plot then received good showers to emerge very well, but it turned very dry with the location over 7 inches below normal. Plants grew very tall with tassels above the gleaner cab. Ear size was all across the board with a small amount of tip back and a small seed size. There was no weed pressure. Plants were matured well and stalks were standing strong. Some tar spot could be seen in the plot.
