

Titan Pro Seed Finisher

(applied on all soybean packages)

Key Benefits:

- **Reduced dust during handling:**
Larger particle size settles quicker to reduce airborne dust
- **Decreased drying time:** Improved handling performance on high application rates
- **Reduced bridging:** Improved flow through treating and planting equipment, as well as seed boxes and tenders
- **Improved singulation for planting:** Optimizing seed performance in planting equipment
- **Premium appearance:** Formulated for enhanced visual appearance

Use Titan Pro Seed Finisher to reduce dust during handling and application while seed is being treated.

Titan Pro Seed Finisher

L-SF1 is formulated to reduce dust during handling and application compared to other seed finishers on the market.

Recommended Rate: 0.5 oz/unit

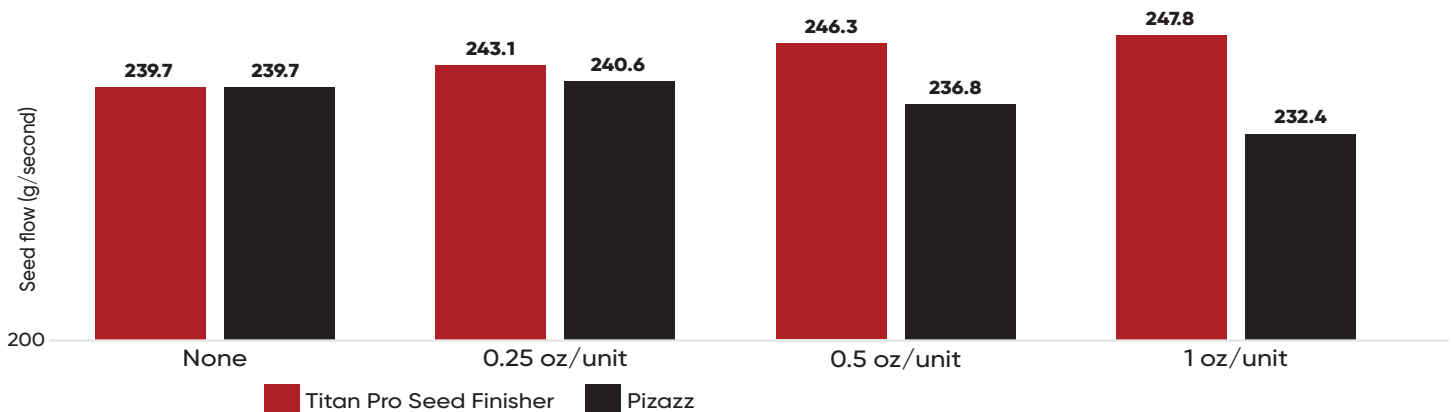

- Can be adjusted as needed based on environmental conditions.

Seed Finishers

Seed finishers are dry powders applied to soybean seed while mixing in the treating drum. They can reduce tackiness of treated seeds during the drying process to improve seed flow and limit bridging.

Seed Finisher Flowability

Data generated at Center for Seed Applied Technologies | Johnston, IA 2022

Improved flowability: Under warm and humid conditions, Titan Pro Seed Finisher shows a faster rate of seed flow compared to Pizazz.
