

Titan^{pro} Tri Up™ SEED TREATMENT

FEATURES & BENEFITS

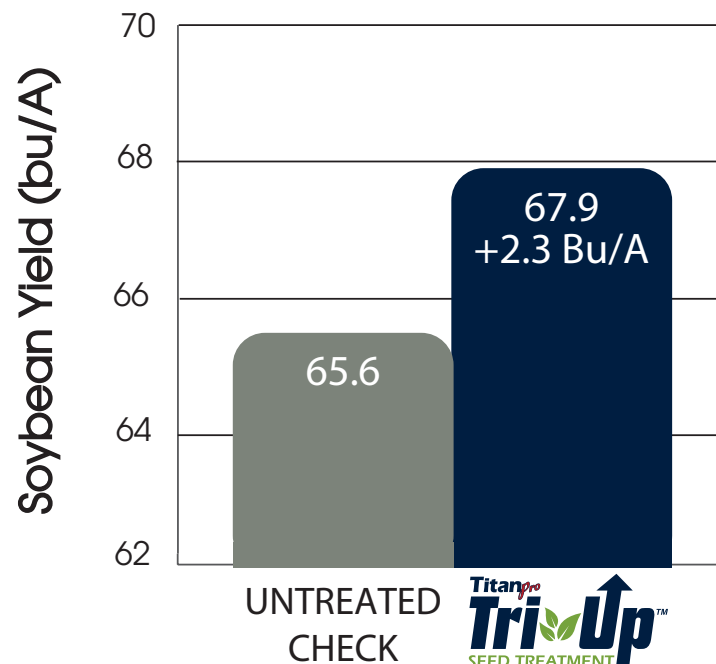

- ✓ Improved seed germination and early growth for evenly merged stands
- ✓ Gets the crop off to the right start to overcome early season stress and yield loss
- ✓ Includes a balanced ratio of Cytokinin, Gibberellic Acid, and Auxin to stimulate germination and early growth
- ✓ Provides five essential nutrients for early and efficient uptake for enhanced growth
- ✓ Provides Systemic Acquired Resistance (SAR) Technology for season long defense against White Mold, SDS and other diseases
- ✓ Enhances early seedling vigor and crop development to drive yield potential

USE RATE: 1.45 FL. OZ./CWT

ENHANCE SEEDLING EMERGENCE WITH A MULTI-MODE OF ACTION BIOSTIMULANT IN COMBINATION WITH PROVEN SAR TECHNOLOGY TO SUPPRESS WHITE MOLD AND SDS DISEASE SYMPTOMS

TRI-UP SOYBEAN DATA

12 Replicated Trials - Rate: 1.45 fl oz/cwt
3-Year Average

Titan^{pro} Tri Up™ SEED TREATMENT

CUSTOM BLEND COMPONENTS

Phosphorus	0.70%
Manganese	0.05%
Boron	0.50%
Iron	0.10%
Zinc	0.50%

- ✓ Combination of 5 essential nutrients placed on the seed for seedlings to maximize early and efficient uptake.
- ✓ Blend of extracts including amino acids, glucose, and vitamins to induce enzyme activity, enhance germination and early growth.
- ✓ Includes a balanced ratio of Cytokinin, Gibberellic Acid, and Auxin to stimulate early growth and uniform emergence.

BALANCED RATIO OF HORMONES

CYTOKININ (KINETIN)
GIBBERELIC ACID (GA)
INDOLE-3-BUTRYIC ACID (IBA)

- ✓ Heads Up is a patented proprietary composition based on naturally occurring plant extracted biochemicals.
- ✓ When applied as a seed treatment it enables the germinating seed to inhibit the attacking disease through its own defense mechanisms.
- ✓ S.A.R. activates the plants own genetic resistance to diseases by stimulating the plants natural defense pathways before disease sets in.
- ✓ Offering full season protection against yield robbing pathogens.
